

Feedback for the current work:

Great. I only have few comments.

The non functions chapter need performance (max. timeout time of command send to answer is received)

You have mentioned Appendix X but where is it placed in the report?

Not all test cases is fully implemented. Will that be done before hand-in?

What does the 78,81% solution mean?

The number of pages in project report we can discuss at the meeting

I am looking forward to see the hw/sw demo

Action points:

- Make sure to address the above-mentioned issues;
- Prepare a video presentation in case of online examination
- Finish documentation
