Feedback for the current work:
- None – work in progress

Action points:

1. Time schedule - prepare a detailed time schedule to make sure we keep an eye on the progress and available resources;
2. Fix use case diagram based on the "official" model from the uml book;
3. Send the requirements and fixed use case diagram;
4. Use case descriptions - preliminary based on the use case diagram;
5. Plan a face-to-face - at VIA Wednesday morning - Poul will make the room reservation and define a meeting;
6. Make sure to add Action Points on who's responsible for different things - i.e. not who has to do them, but who makes sure they are done - ex. Someone is responsible for making sure that email with requirements/use case diagram is sent;
